

Support Church Planters Just Like These!

Starting a church plant is not an easy feat, yet the Reformed Church in America has a fast-growing network of church planters. With passion, creativity, and great diversity, these church planters are changing the face of the RCA. They are reaching into every corner to spread the gospel of Jesus Christ, with church plants springing up all across North America.

RCA Church Multiplication introduces you to just a few of the denomination's newest church planters. Your support makes it possible for these planters and more like them to flourish in their call to make disciples.

TIFFANY FAN

Church plant: Grace Christian Church,
Bronx campus

Location: Westbury, New York

After wrestling for a year with her call to ministry, Tiffany Fan, a teacher, enrolled in New Brunswick Theological Seminary and will graduate in May 2021. She and her husband have been members of Grace Christian Church and participated in the church's outreach and Bible study events in the Bronx. That small group needed a consistent meeting space and found that the RCA's Classis of New York had a nearly empty building available. With a meeting place and a team of leaders, this church plant in the Bronx is reaching an array of new neighbors, many of them from the medical profession. Tiffany, as one of the preachers, is a piece of this growing ministry. The church holds services in both Chinese and English.

It takes partnership to plant new churches. We need your help to start new ministries like these each year. Support planters like these to make new disciples! Visit www.rca.org/church-planting/support and make a gift today.
