

# 2023 Year in Review

## Jaime and Martha Amaro - Mexico

### A glimpse at what your support made possible:

It is difficult to compact a year of gratitude towards your partnership, here are some of what you made possible.

In 2023, thanks to your generosity, we were able to return to Cuba with a team of five Mexican leaders to train in Children and Worship (C&W) and also provide materials for eight churches. The program is growing rapidly in this country—hundreds of children are taught every Sunday throughout the island.

In Mexico, thousands of children were part of VBS and you helped local leaders train hundreds of new C&W leaders because of the financial commitment from your church.

## Our challenges of 2023

Along with the blessings, also came the trials. Jaime underwent radical surgery to eradicate prostate cancer in January. January and February were full of recovery and therapies, however we feel very loved by all of your support.

By the grace of God, we continue in the battle. It has been difficult to travel, train, and visit the USA for three months alone. However, our Mexican team has done a great job supporting us. All programs keep running!

## Please Pray

- Don't stop praying for us—we are both now in our sixties.
- Our battle against Jaime's cancer continues and we pray to God for strength and economical provision for medical services.
- For wisdom to coordinate the programs in Mexico and Cuba while we develop local leadership
- Pray for the church plant that is under religious attack. The local priest is determined to close our mission.
